- Heroku Deployment
- Javascript
- Typescript
- HTML5 and CSS3
- API Implementation
- Bootstrap and Material UI

Learned Javascript fullstack development from back end management using Node.js to front end development using React and Angular both individually and in a team.

PROJECTS

Aardvark's Party Rentals Website— *website redesign*

Began work on updating the company's website using Bootstrap and responsive design. Stopped work due to liquidation. I retained ownership of the source files for this upgrade (available for review upon request).
